

INOXPA is offering perfect test facilities

A unique pilot plant enables the customers to understand equipment features and applications, offering functional tests using actual products prior to purchase and installation.

INOXPA Skandinavien A/S is the sales and distribution center for all the Nordic countries. We keep a wide range of sanitary flow components, such as pumps, agitators, mixers, filters and valves at the warehouse in Horsens. In this way we can give our customers the

Mini dairy from INOXPA

best professional service, and secure short delivery on all standard products.

INOXPA is a renowned and long-standing business group specialized in the manufacture and trade of stainless steel components, management of processes and services for different industries. Its commitment to innovation and continuous improvement has allowed INOXPA to enter the global market without compromising its product quality or customer relations.
