

SPX FLOW Factory Expert Automation:

Helping you embrace the future

Whether you are looking to build a new plant, embrace the future with Industry 4.0 technologies, expand your current production facilities, enhance production efficiency, or manage obsolescence; SPX FLOW can help.

Factory Expert is a modern, vendor-independent solution – so it can include control, visualisation, reporting and information systems from a range of world-leading vendors, to give the performance and versatility you require for your business. By integrating the latest digitisation strategies SPX FLOW can help you continually improve your production line performance to minimise downtime and maximise profits.

Our understanding of the needs of the dairy, food & beverage industries is unlike any other automation supplier. We know how to optimize processes to make them more efficient and effective and how to turn the data collected from

processing lines into useful, intelligent information. We can help you develop a strategic pathway to harness the benefits and processing improvements of modern technology, while giving you the peace of mind that we understand your industry.

We will take the time to understand your operational goals and help you

achieve them quickly and efficiently. We have the experience and proven strategies to best enhance your productivity and profitability whilst maintaining the quality and safety of your products.
